KATIM Focuses on Europe with Presence at Upcoming Critical Communications World 2023

- *EDGE Group's secure communications entity KATIM will demonstrate its portfolio of ultra-secure devices and network encryption solutions throughout the three-day event*

EDGE entity, KATIM, a leader in the development of innovative and ultra-secure communication solutions, has announced its participation at Critical Communications World 2023, the leading global conference and exhibition for the critical communications sector, being held in Helsinki, Finland, from 23-25 May.

On display at KATIM's stand will be a range of ultra-secure endpoint devices, including KATIM X2, a 5G ultra-secure smartphone for government leaders, top executives, emergency responders, and individuals and teams working with sensitive information; and KATIM R01, a ruggedised smartphone for critical communications in the harshest field conditions.

KATIM will also showcase its latest network encryptor, KATIM Gateway 9011, which provides advanced post-quantum encryption for sensitive communications and data transfer to counter the growing increase of data-in-transit interference. Designed to protect the most sensitive and mission-critical data, KATIM Gateway 9011 is ideal for large-scale deployments including government buildings, data centres, and other critical infrastructure and services, such as public safety and emergency services, utilities, and transportation.

During the event, KATIM will offer a preview of its new products and innovations which offer even more advanced security features and capabilities that meet evolving operational needs of its customers.

Attendees of Critical Communications World 2023 can visit KATIM at stand P21.
